## VACCINATIONS BY DEMOGRAPHIC CHARACTERISTICS

Data on vaccinations among children under 11 is forthcoming. For information on vaccine eligibility and availability, or to schedule your Covid-19 vaccine, [click here](#). Percentages refer to the percentage of age group population with at least one dose. Percentage vaccinated might appear to exceed the estimated number of individuals in a given age group or category. This could be due to increases in current resident numbers versus census estimates, which are based on 2018 census data.

**Fig. 9. Percent Complete Vaccination and COVID-19 Case Rate (per 100,000 population) by Census Tract, October 11 – November 7, 2021**

**How to interpret these colors:** The darker the blue, the better. The upper most blue box indicates low COVID-19 case rates and high vaccination coverage. Red is not ideal as red indicates high COVID-19 case rates and low vaccination coverage. Colors in between indicate varying combinations of COVID-19 case rates and vaccination coverage. COVID-19 case rate reflects new COVID-19 cases diagnosed between October 11 and November 7, 2021 across Fulton County.
