## Preface

This Annual Report would not be possible without the dedication and professionalism of the employees who worked for the Fulton County Medical Examiner in Atlanta, Georgia during the time period covered by this report. They are:

### Administrative and Support Personnel

John M. Cross, Deputy Director  
Paul Desamours, Operations Manager  
Barbara Pringle-Small, Administrative Coordinator  
Simone Murphy, Medicolegal Transcriptionist  
Lynnette Redding, Medicolegal Transcriptionist  
Angela Wright, Records and Documents Supervisor  
Karleshia Bentley, Administrative Assistant  
Tia Baynes, Customer Service  
Shirley Gleaton, Customer Service

### Medical Examiners

Randy Hanzlick, MD, Chief Medical Examiner  
Michele T. Stauffenberg, MD, Deputy Chief Medical Examiner  
Geoffrey P. Smith, MD, Associate Medical Examiner  
Michael M. Heninger, MD, Associate Medical Examiner  
Karen E. Sullivan, MD, Associate Medical Examiner  
Kim A. Collins, MD, Medical Examiner  
Jonathan Eisenstat, MD, Medical Examiner  
Kelly Rose, MD Forensic Pathology Fellow  
Stacey Tate, MD, Forensic Pathology Fellow

### Investigative Staff

Mark Guilbeau, PhD, DABMDI, Senior ME Investigator/Forensic Anthropologist  
Tami Schroder, DABMDI, Senior ME Investigator  
Mike Alsip, DABMDI, ME Investigator  
Mary Beth Hauptle, DDS, DABMDI, ME Investigator, Forensic Odontologist  
Betty Honey, DABMDI, ME Investigator  
Teresa Price, ME Investigator  
Mark Ruffin, ME Investigator  
Jon Hager, ME Investigator  
Laura Salm, ME Investigator  
Leon Harrison, ME Investigator  
Dumonder "Reda" Dawson, ME Investigator  
Clinton Harbin, ME Investigator

### Forensic Technical Support

Charles Love, Forensic Technician Supervisor  
Angie Fuller, Forensic Technician Assistant Supervisor  
Carlos Evans, Forensic Technician Assistant Supervisor  
Kathy Washington, Forensic Technician  
Chefrene Gory, Forensic Technician  
Eric Bailey, Forensic Technician  
Glenda Buchek, Medical Lab Technician  
Mary Burgess, Medicolegal Photographer  
Steve Moore, Medicolegal Photographer  
Monica Melchor, Morgue Attendant  
Patricia Mossenicass, Morgue Attendant

### Custodial Services

Walter Williams  
Sharon Matthews

Without the above individuals, quality investigation of deaths in Fulton County would not occur, and neither would professional communication with the many agencies and members of the public who are impacted when a death occurs. These employees also care for and maintain a modern facility in which death investigations may be professionally conducted with respect for the dead and at which members of the public, legal, and law enforcement communities can effectively conduct their business.

I thank the Fulton County Medical Examiner employees— each and every one— for their dedication, excellence, and professional quality death investigations conducted for the citizens of Fulton County. We are proud to be a death investigation center fully accredited by the National Association of Medical Examiners.

It is hoped that the information in this report may be useful to public health, public safety, and other policy and program planners who strive to improve the safety and quality of life. Additional data may be available for specialized studies that go beyond the general data presented in this report.

The medical examiner’s office and its personnel “speak for the dead” and our office is a place where “death delights to serve the living.” It is with a true sense of civic duty and public service that we conduct our death investigations for the community.

It is now 2010 and this Annual report is for calendar year 2009. It is not uncommon for some death cases to take many months to finalize because of extensive testing or the need for investigative information that takes time to obtain. The Report itself takes time to prepare, and must be done while we carry on our usual activities and death investigations, which also take the time of our staff. We hope to continue preparing our annual report by July of each year.

NOTE: Rather than providing large numbers of Tables, Graphs, and Figures, data are presented with an overall summary table followed by a list of cases with relevant detail. These lists can be used to categorized data in whatever manner a reader/user wishes to do. More detailed data can be provided by FCME if release of such data is compliant with applicable laws, policies, and procedures.

## SECTION I. INTRODUCTION

The Fulton County Medical Examiner (FCME) serves all non-federal, incorporated and unincorporated areas within Fulton County. In 2008, these areas include nearly all of the City of Atlanta, Alpharetta, Chattahoochee Hills, College Park, East Point, Fairburn, Hapeville, Johns Creek, Milton, Mountain Park, Palmetto, Roswell, Sandy Springs, Union City, Unincorporated Fulton County, and other areas served by special law enforcement agencies such as MARTA and college police forces. The FCME does not serve the few areas of Federal property within the county such as the Federal Penitentiary or which arranges for its own investigations. Some deaths occurring on state property are investigated by the GBI. Under the provisions of the Georgia Death Investigation Act, FCME investigates deaths that are suspected or known as having resulted from external causes such as injury or poisoning, and deaths that are sudden, unexpected, and not explained with a reasonable degree of medical probability. Other selected types of death are also investigated such as those occurring while a person is in custody of law enforcement agencies.

The County covers 529 square miles and has an estimated population of about 1,014,000. Countywide, the population is about 48.4% white, 42.3% black, and 8.3% other minorities. The Hispanic population is increasing and amounts to about 7.9%.

The laws describing the duties of medical examiners in Georgia are contained mostly in Official Code of Georgia Annotated, Title 45, Chapter 16, the “Georgia Death Investigations Act.” The types of death required to be reported to the medical examiner include:

- Violence (injury)
- Casualty (accident)
- Suicide
- Suddenly when in apparent good health
- When unattended by physician (no doctor who can sign the death certificate)
- Suspicious or unusual
- Children under 7 if death is unexpected or unexplained
- Executions pursuant to death penalty (these do not occur in Fulton County)
- Inmate of state hospital or state, county, or city penal institution
- Admitted to hospital unconscious and dying within 24 hours without regaining consciousness

Decisions about autopsies are not mandated and are left to the discretion of the medical examiner. As can be seen, the laws are general enough that jurisdiction may be accepted in a wide variety of cases that are not otherwise specified in law, such as sudden death while under anesthesia, which may be considered to be “sudden and unexpected” or “unusual.”

When a death is reported to FCME, the case is either **accepted** (AJ) or **declined** (DJ). If a case is accepted, it means that the medical examiner will be signing the death certificate (certifying the death). A case is **declined** for one of two reasons:

- The incidents leading to death did not occur in Fulton County
- The death need not have been reported and there is a physician who is willing to sign the death certificate.

A case is **accepted** if:

- It meets the criteria specified by law as described above, and
- The incident leading to death occurred in Fulton County, or
- If the place of incident or onset of fatal events is unknown, the death occurred or the dead body was found in Fulton County

The case medical examiner (forensic pathologist) generally uses one of four approaches to certify a death (obtain information to complete the death certificate):

- **Signout.** The death certificate is signed without examining the body.
- **View.** A cursory examination is performed to further evaluate the case and rule out trauma or the need for further in-depth examination. A few simple case notes may be prepared.
- **External examination.** Formal external examination with a dictated report of the examination, usually including toxicology or chemistry tests as well.
- **Autopsy.** Complete autopsy with dictated report. A **limited dissection** (partial autopsy) is sometimes performed if:
  - there is expressed objection to autopsy or significant health or safety risks exist for staff, and,
  - a complete autopsy need not be performed.

There are basic general "rules" for classifying manner of death:

- **Natural** deaths are due solely or nearly totally to disease and/or the aging process.
- **Accident** applies when an injury or poisoning causes death and there is little or no evidence that the injury or poisoning occurred with intent to harm or cause death. In essence, the fatal outcome was unintentional.
- **Suicide** results from an injury or poisoning as a result of an intentional self-inflicted act committed to do self harm or cause the death of one's self.
- **Homicide** occurs when death results from a volitional act committed by another person to cause fear, harm, or death. Intent to cause death is a common element but is not required for classification as homicide (more below). It is to be emphasized that the classification of homicide for the purposes of death certification is a "neutral" term and neither indicates nor implies *criminal* intent, which remains a determination within the province of legal processes.
- **Undetermined** or "could not be determined" is a classification used when the information pointing to one manner of death is no more compelling than one or more other competing manners of death, in thorough consideration of all available information.

In general, when death involves a combination of natural processes and external factors, such as injury or poisoning, preference is given to the non-natural manner of death.

### **Budget and Staff**

The current operating budget is \$3.45 million. The FCME staff consists of 39 employees including 5 full-time physician medical examiners, 11 investigators, 6 clerical staff, 3 administrators, 11 forensic technicians and support staff, and 2 custodians. We also have one forensic pathology physician in training with the position funded by Emory University School of Medicine.

### **General Response**

When a death is reported to FCME, the case is assigned a sequential case number. Basic information is obtained on all cases reported. Investigators, in consultation with the on-call medical examiner as needed, make decisions about whether the case should be accepted or declined, if death scene investigation is required, and whether or not the body need be transported to the Fulton County Medical Examiner's Center. The on-call medical examiner then makes decisions about the type of examination to be conducted and the extent of additional testing to be performed. Usually, bodies transported to FCME are returned to the family and funeral home within 24 hours or less if the body has been officially identified.

For further information about FCME, please see our website at [www.fcmeo.org](http://www.fcmeo.org)

For further information about medical examiners and death investigation, please see the website of the National Association of Medical Examiners at [www.TheNAME.org](http://www.TheNAME.org)

### **Data Source and Analyses**

The data herein are derived from the HOMER (Holds Our Medical Examiner Records) Access database. In 2009, there were 2371 deaths reported to the office (100 more than last year). Ten of these records were non-human remains, and two death reports were noted to be duplicate records. Thus, after excluding these 12 records from data analysis, there were a total of 2359 unique human death cases for this report.

### **Race/Ethnicity Categories**

Categorizing Race/Ethnicity of decedents has become more difficult because of a growing mixed-race population and because of personal preferences in how Race/Ethnicity is reported by family members.

For our database purposes, we assign race as follows:

B = Black or African American

W = White/Caucasian

WH = White Hispanic/Latino

BH = Black Hispanic/Latino

H = Hispanic/Latino

AS = Asian

PI = Pacific Islander

NA = Native American/Eskimo

Thus, for tabulation of Hispanic/Latino decedents, cases coded as WH, BH, or H would be used.

For decedent age, an H means Hours, D means Days, W means Weeks, and M means Months. Thus, a 4-month-old would be indicated as M04. Fetus is FET and stillborn is SBN. For all other ages, 3 digits are used. Thus, a 42-year-old would be 042.

For any data item, a blank means unknown or that the information was not obtained.

\*It is office policy in SIDS-like cases to certify the manner of death as undetermined rather than natural unless another manner of death is identified. “Stressor” indicates some risk factor was present such as soft bedding. “Disease” means that disease was present but significance in causing death is unknown. “Both” means that disease and a stressor were present. “Classic” means that neither disease nor a stressor was identified. “Not SIDS” means that the circumstances were not consistent with SIDS but a specific cause of death was not determined.

### Deaths Caused by Drugs, Poisons, or Chronic Abuse (156 Cases)

Table 24. Deaths caused by drugs, poisons, and chronic abuse, arranged by manner of death

MANNER	AGE	RACE	SEX	CAUSE	Due to:	Due to:	Other Conditions
ACCIDENT	040	B	F	Acute ethanol intoxication			
ACCIDENT	046	B	M	Cocaine use associated with an aortic dissection			Hypertensive cardiovascular disease
ACCIDENT	048	B	F	Mixed drug poisoning			
ACCIDENT	048	B	F	Acute cocaine poisoning			Seizure disorder
ACCIDENT	051	B	M	Mixed drug overdose			
ACCIDENT	027	B	M	Toxic effects of cocaine and heroin			Pneumonia
ACCIDENT	057	B	M	Combined Toxic Effects of Cocaine and Ethanol			Human Immunodeficiency Virus Infection
ACCIDENT	027	B	F	Combined toxic effects of opiates, alprazolam, amitriptyline....	...doxylamine, and hydroxyzine.		
ACCIDENT	023	W	M	Combined toxic effects of heroin and ethanol			
ACCIDENT	054	B	M	Toxic effects of opiate and ethanol use			
ACCIDENT	054	W	M	Acute cocaine toxicity complicating...	...atherosclerotic heart disease (Amended)		
ACCIDENT	034	W	M	Difluoroethane (Freon) toxicity			

MANNER	AGE	RACE	SEX	CAUSE	Due to:	Due to:	Other Conditions
ACCIDENT	028	B	F	Combined toxic effects of cocaine and ethanol

ACCIDENT	042	B	M	Acute cocaine poisoning			
ACCIDENT	043	W	M	Acute opiate and ethanol toxicity			
ACCIDENT	059	W	M	Acute cocaine toxicity (Amended)			Chronic Alcohol Use, Emphysema, Bronchitis
ACCIDENT	052	B	M	Acute cocaine poisoning			
ACCIDENT	058	B	M	Acute cocaine poisoning (Amended)			Hypertension, AIDS
ACCIDENT	054	B	M	Combined toxic effects of cocaine and methadone			Chronic lung disease; Congestive heart failure
ACCIDENT	041	B	M	Cocaine Toxicity Complicating End-Stage Renal Disease			Hemoglobin SS Disease, Hypertension
ACCIDENT	035	W	M	Combined Toxic Effects of Ethyl Alcohol, Methadone and Alprazolam			
ACCIDENT	048	W	M	Combined toxic effects of cocaine, ethanol, and benzyloperazine			Hypertensive cardiovascular disease
ACCIDENT	051	W	M	Oxycodone toxicity			Squamous cell carcinoma of the tongue; Hypertension
ACCIDENT	031	W	M	Combined toxic effects of cocaine, methadone, and fentanyl			
ACCIDENT	055	B	M	Cocaine toxicity aggravating acute asthma exacerbation			
ACCIDENT	029	H	M	Combined toxic effects of cocaine and ethanol			
ACCIDENT	045	W	M	Combined Toxic Effects of Cocaine and Opiate			

MANNER	AGE	RACE	SEX	CAUSE	Due to:	Due to:	Other Conditions
ACCIDENT	025	W	M	Combined toxic effects of gamma-hydroxybutyric acid (GHB) and cocaine			
ACCIDENT	057	B	M	Acute fentanyl poisoning			Hypertension
ACCIDENT	072	W	M	Carbon monoxide poisoning			Atherosclerosis, hypertension, diabetes, prostate cancer
ACCIDENT	053	B	F	Acute cocaine intoxication			
ACCIDENT	018	W	M	Oxycodone Toxicity			
ACCIDENT	067	B	M	Acute ethanol intoxication			Atherosclerotic and hypertensive cardiovascular disease
ACCIDENT	052	B	M	Acute heroin poisoning			Hypertension, Diabetes mellitus
ACCIDENT	052	W	M	Toxic effects of fentanyl, duloxetine, zopiclone, morphine			Acute focal bronchopneumonia
ACCIDENT	024	W	F	Heroin toxicity			
ACCIDENT	051	W	M	Acute exacerbation of chronic ethanolism			Hypertension
ACCIDENT	045	B	M	Acute cocaine and ethanol intoxication			
ACCIDENT	052	B	M	Hypertensive cardiovascular disease complicated by cocaine use			Human immunodeficiency virus infection
ACCIDENT	053	B	F	Combined toxicity of hydrocodone, benzodiazepines, and barbiturates			Hypertension
ACCIDENT	048	B	M	Hypoxic encephalopathy	Acute cardiac failure	Coronary artery atherosclerosis aggravated by acute cocaine use	Empyema
ACCIDENT	043	B	M	Acute cocaine toxicity aggravating....	.... atherosclerotic coronary artery disease		Hypertension, Cirrhosis
ACCIDENT	053	W	M	Combined toxic effects of methadone and cocaine			Hypertension
ACCIDENT	024	H	M	Acute heroin and codeine intoxication			
ACCIDENT	047	B	F	Intraparenchymal brain hemorrhage	Acute cocaine use		
ACCIDENT	054	B	M	Cocaine Use complicating

\*\*Indicates cases in which body was examined by an investigator and/or medical examiner

## General trends

- The number of cases reported to the medical examiner is increasing
- The homicide rate is highest among the black population
- The suicide rate is highest among the white population
- The homicide rate is the lowest it has been in many years
- Most homicides are committed with guns
- Most suicides are committed with guns
- Most accidental deaths are due to falls (mainly in the elderly) or drug overdoses
- Drivers and pedestrians account for nearly 60% of traffic fatalities
- Most cases of undetermined manner involve infant deaths
- More than half of natural deaths are due to hypertension and/or coronary artery disease
- 50% of deaths among the homeless are due to natural causes but 31% are due to accidents and 13% are due to homicides
- 22% of deaths among the elderly are due to injuries sustained from falling
- 27% of deaths among children are accidents and 13% are homicides
- The most common drug that causes death is cocaine. Heroin deaths may be increasing.
- Prescription drugs are implicated in about 43% of drug-caused overdose deaths

## Comments

The services provided by the Fulton County Medical Examiner go far beyond the routine duties of conducting death investigations. Some of these other services include:

- Testifying in Court Cases
- Participating on Child Fatality Review Teams
- Giving Lectures and Training Sessions
- Providing a Forensic Pathology Fellowship Training Program
- Providing Death Investigation Internships and Clerkships
- Instructing Pathology Residents in Forensic Pathology
- Serving on State and National Committees and Advisory Boards
- Reporting Notifiable Conditions to the Health Department
- Reporting Applicable Deaths to Federal Agencies such as the Consumer Product Safety Commission, FDA, and the Drug Abuse Warning Network
- Preparing Scientific Articles and Research Papers
- Participating in National Organizations and their Activities
- Preparing Press Releases
- Maintaining an Office Website
- Developing In-house Databases
- Reporting Unidentified Decedents to NCIC and the NamUs Unidentified Decedent Reporting System
- Reporting Relevant Case Information to National Registries such as the National Association of Medical Examiner's Pediatric Toxicology Registry
- Providing Forensic Pathology and Death Investigation Experience to Medical Students at Morehouse School of Medicine, Emory University School of Medicine, and other Medical Institutions
- Participating in Studies and Programs Conducted by the Centers for Disease Control and Prevention
