Collaborating for Our Water Resources

The Fulton County Department of Public Works would like to thank each student who participated in our annual Art Calendar Contest. For this calendar, Fulton County K-12 Students were asked to create art that speaks to the importance of water conservation and pollution prevention.

Our message is simple at its core: The Chattahoochee River is our lifeline and our job as users of this water resource is to carve a path founded in conserving quantity and protecting quality for the needs of the environment and anyone requiring access for survival. Our Public Education and Outreach team serves to bring this message, with program resources, to Fulton County residents throughout the year. This work couldn't be accomplished without our partners in schools, communities, cities and environmental education centers throughout Fulton County. We encourage you to find inspiration from these beautiful pieces and join us as a partner in protecting our most valuable resource - water. The impact made by connecting with partners can exponentially grow when the essential work is shared by many hands, and brings a stronger benefit to our watershed and the river it connects to. Let this calendar serve as a gentle reminder about your connection to water and to inspire you to protect it through your daily actions.

Natalie Hall, Commissioner, District 4

Marvin S. Arrington, Jr., Commissioner, District 5

Joe Carn, Commissioner, District 6

Dick Anderson, County Manager

DON'T BE MEAN, KEEP IT CLEAN!

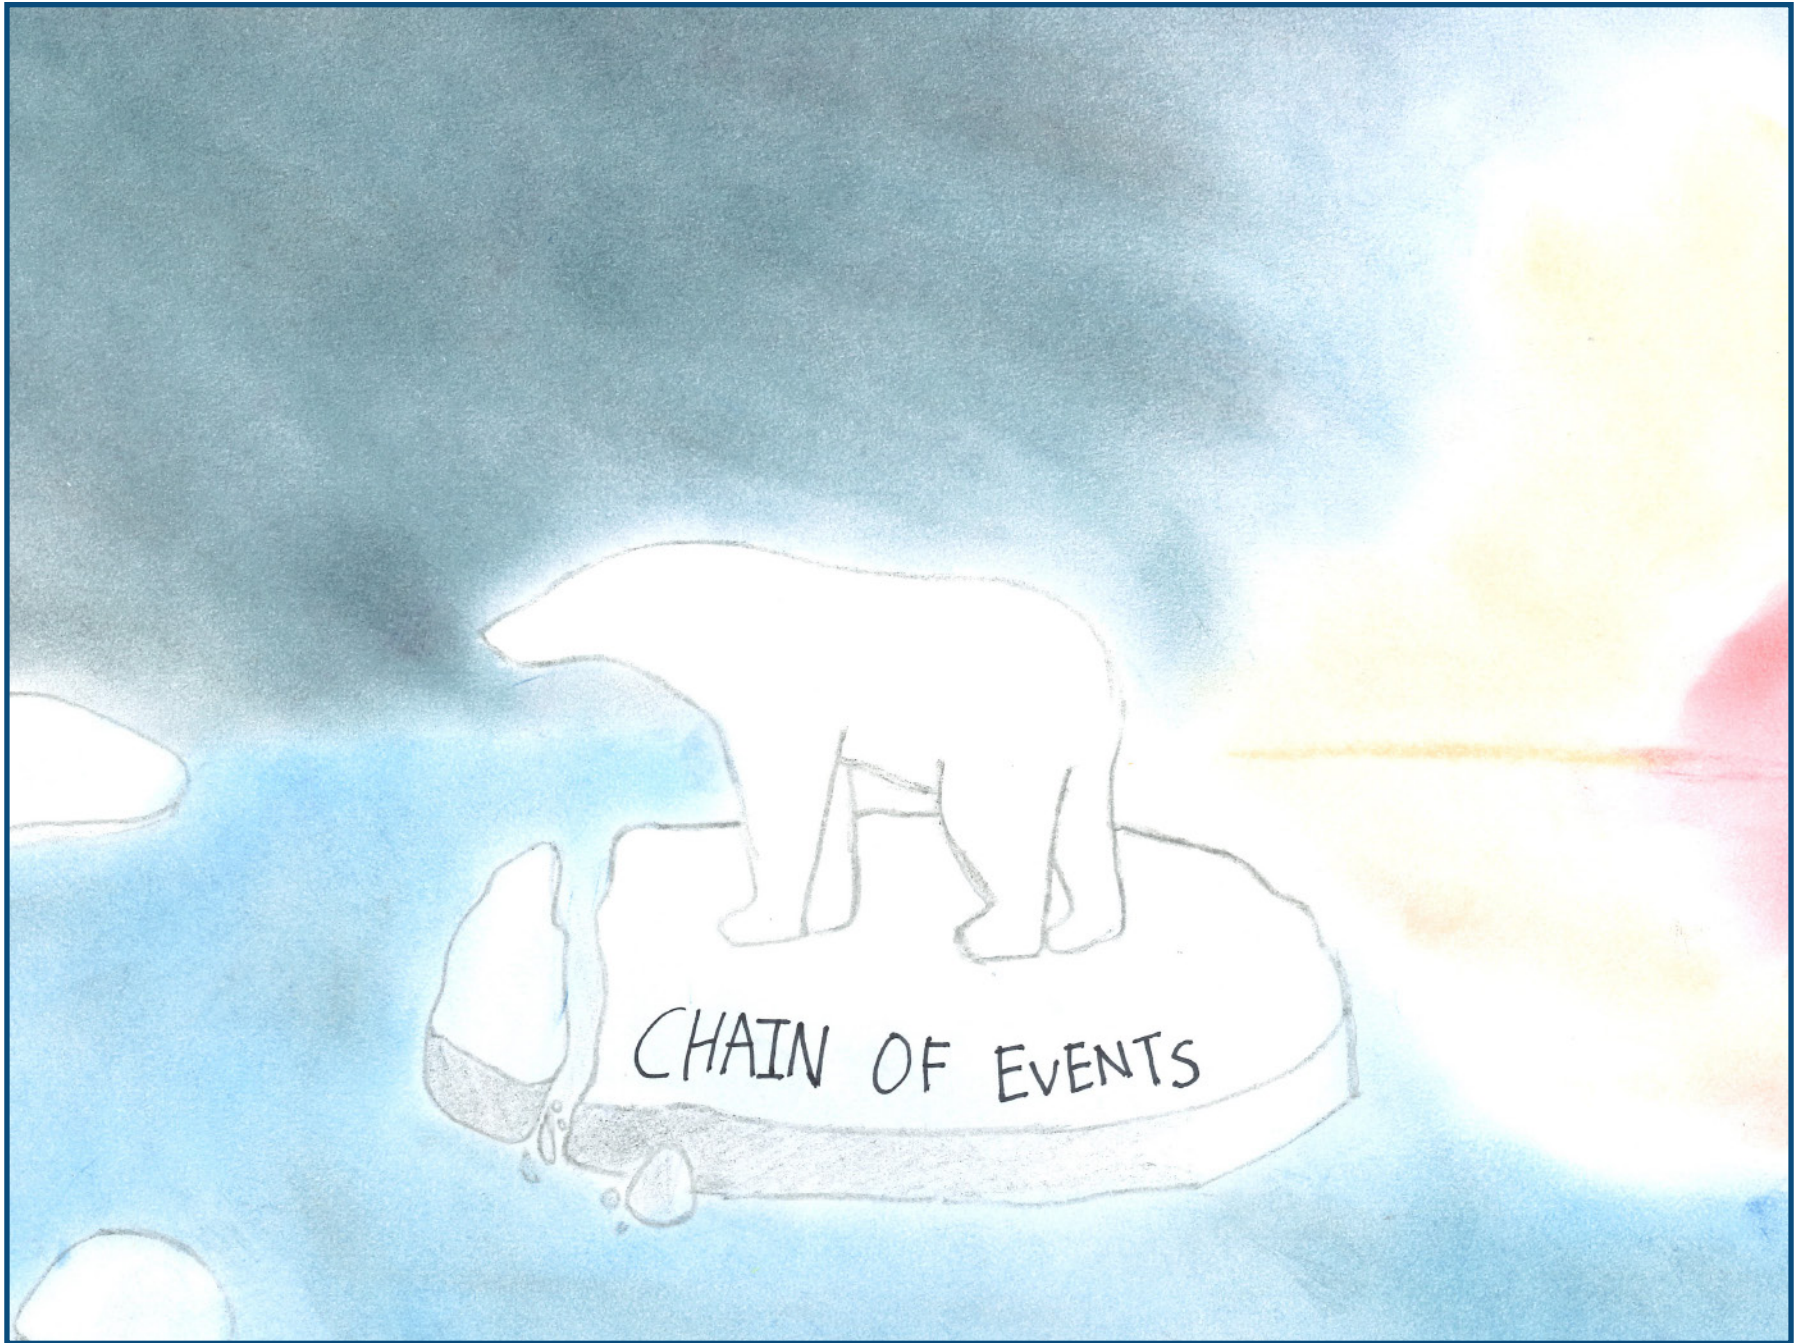

Fulton County Public Works is committed to keeping you safe by providing clean drinking water and properly managing your wastewater. It can be challenging keeping water resources clean with a constant supply of litter - much of which ends up in our waterways. We use water in our everyday activities - brushing our teeth, showering, doing laundry, and even drinking a glass of water. Imagine how different that water would be if it was filled with pollutants. That's why we need your help to keep our water clean! By following the methods below, you can help reduce the amount of litter in our water sources:

- **REDUCE** your litter by buying only what you need! Choose items that have less packaging and that use recycled materials.
- **REUSE** plastic containers instead of throwing them away. Did you know that plastic bottles and containers are the most commonly found things in river clean ups? There are many fun ways to repurpose these items such as storage containers or craft supplies.
- **RECYCLE** what you can! Check with your residential waste hauler to see if curbside recycling services are available. If not, there may be a recycling center in your area.
- **TRASH? BALDERDASH!** Some things can't be disposed of by practicing the 3 R's above, so make sure you know how to properly discard your trash in the proper place.

Become a water ambassador by getting involved in one of our volunteer programs! Monitor the water quality of your local waterways through our Adopt-A-Stream Program or participate in a stream cleanup. Fulton County's Storm Drain Marking and Adopt-A-Drain programs are also quick and easy ways to impact your community and prevent flooding by keeping waterways clean. To learn more about our programs, call us at 404-612-7400.

DO YOUR PART, BE WATER SMART! Together we can keep Fulton County clean and prevent water pollution.
